Product generalist with developer-facing experience at an AI startup and Berkeley data science training. Turns firsthand user insight into product decisions and directs AI-assisted implementation of working tools.

PRODUCT EXPERIENCE

Nora | AI coding agent for on-chain development · Product Hunt #1 Product of the Week Sep 2025 - Mar 2026
Founding Developer Relations Engineer Los Angeles / Remote

- **Product direction.** Continually helped shape Nora's product roadmap through competitive research and developer insights; recommended an on-chain focus that the CEO adopted.
- **Vendor decision.** Settled an LLM-gateway choice with evidence: designed a latency and reliability comparison, separated spending-cap failures from provider failures, and declined the switch.
- **Developer demos & education.** Made Nora's capabilities concrete for developers: directed working demos of a Solana order book and an EVM prediction market and designed OpenBuild courses and Solana tutorials; 1,000+ participants, 300+ of whom joined an ongoing community.
- **Content and community.** Turned AI capabilities into use cases developers could evaluate: owned the company's X content and release communications; company posts drew ~125K views.

INDEPENDENT PRODUCT & RESEARCH

Independent AI Research & Product Practice Mar 2026 - Present
Product Lead and Research Author Los Angeles, CA

- **Multi-agent coordination.** Made separate coding-agent sessions work together with their native tools and approvals: conceived [pneu](#), an open-source tool for exchanging tasks and reviews across harnesses; directed AI-assisted implementation; submitted to OpenAI Build Week.
- **Product development.** Took pneu from concept into daily use, defining workflow requirements, setting priorities, and directing AI-assisted implementation; continually refined the coordination architecture and user experience through firsthand use.
- **Research.** Originated research on Bitcoin accumulation versus shareholder value, with a paper submitted to AFA 2027; designed its market-data and SEC-filings foundation for agent queries through MCP.

RESEARCH & STRATEGY EXPERIENCE

QC Capital and Consulting | Multi-family office May 2025 - Sep 2025
Summer Investment Analyst Los Angeles, CA

- **Investment research.** Turned stablecoin economics and prediction-market microstructure into partner-ready theses; authored the Polymarket memo behind the office's investment in Polymarket through a fund.
- **AI research workflow.** Designed a four-stage LLM research workflow for portfolio reviews and macro briefs; produced five monthly reviews across six sectors and eight macro briefs for partners.

H Capital | Growth equity Mar 2021 - Jun 2021
Investment Intern Beijing, China

- **Field research.** Turned a self-originated recovery thesis on Luckin Coffee into field tests of store traffic and pricing; secured Investment Committee backing and led 80 part-time observers across 25 cities.
- **Research design.** Designed the store sample, collected a 1,000-order price sample, and wrote 15+ expert-interview notes, giving the team's unit-economics model primary data on store traffic and realized prices.

EDUCATION

UCLA Anderson School of Management | Master of Financial Engineering Dec 2025

University of California, Berkeley | B.A., Data Science & Statistics Dec 2023

CAPABILITIES

Python, SQL | Claude Code, Codex, MCP, git | English & Mandarin bilingual | Cantonese intermediate
